Doha, Qatar | Immediate Availability

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building scalable SaaS platforms and AI-powered systems using FastAPI, Django, and AWS.

Currently developing **AivioraOps**, a production-grade business operations platform with integrated payments, messaging automation, and ML-based insights. Experienced in designing high-performance **APIs**, integrating **LLM-based features (RAG, semantic search)**, and **deploying** distributed systems using **Docker** and **AWS**.

Strong focus on building production-ready applications with real business impact, automation, and performance optimization.

TECHNICAL SKILLS

Backend: Python, FastAPI, Django, Django REST Framework, REST APIs, GraphQL, SOAP/XML, OAuth2, JWT

AI / ML: LLM Integration, RAG, FAISS, Neo4j, scikit-learn

Frontend: React.js, JavaScript, HTML, CSS

Databases: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3), Docker, Vercel, Firebase

Tools: Git, Celery, WebSockets, Postman, Agile

LIVE PRODUCT

- **AivioraOps** – AI-Driven Business Operations SaaS Platform <https://ops.aiviora.online>
 - Built a production-grade SaaS platform for retail and business operations
 - Designed scalable backend using FastAPI, PostgreSQL, Celery, and Redis
 - Implemented workflows for billing, inventory management, and expense tracking
 - Integrated Stripe payments, Twilio WhatsApp messaging, and SendGrid email services
 - Developed ML-based stock prediction system using scikit-learn
 - Deployed containerized multi-service architecture using Docker and AWS
 - Designed for real-world usage with multi-user workflows and automation pipelines
- **PWA Listing Platforms** – Service Directory ([Live](#)) & Startup Explorer ([Live](#))
 - Designed and deployed two production-ready Progressive Web Apps for listing services and startups
 - Built installable, offline-capable web apps using Service Workers and PWA APIs
 - Implemented performance optimizations including lazy loading and asset caching
 - Developed responsive, SEO-friendly UI for app-like experience across devices

- Designed as lightweight alternatives to native mobile apps for businesses

Tech: React, JavaScript, Service Workers, PWA APIs, Vercel

PROFESSIONAL EXPERIENCE

Backend Software Engineer | iB Advisory – Kochi, India | Oct 2025 – Present

- Designed and developed scalable FastAPI-based backend systems supporting business and AI-driven workflows
- Implemented LLM-powered features for document processing, semantic search, and intelligent responses
- Integrated third-party services using REST APIs with secure authentication (OAuth2, JWT)
- Deployed and maintained applications on AWS (EC2, S3) with PostgreSQL production databases
- Supported backend services used across multiple production modules for international clients
- Collaborated with cross-functional teams and stakeholders to deliver production-ready features

Backend Developer (FastAPI) | Bambus Technologies LLP – Coimbatore, India | Jul 2024 – Sep 2025

- Developed and maintained backend services for **e-commerce platform integrations**
- Built APIs handling complex business logic, data synchronization, and external partner communication
- Worked extensively with **SOAP/XML and REST APIs** for **European clients**
- Supported production deployments, debugging, and performance fixes
- Collaborated with frontend and QA teams to ensure stable releases

PROJECTS

- **AI Image Generation Platform** | FastAPI + React | Stable Diffusion
 - Built backend APIs for AI image generation and job handling
 - Managed request processing, storage, and user interaction flow
- **GraphBot – AI Document Chatbot (RAG)** | FAISS + Neo4j + LLMs
 - Implemented Retrieval-Augmented Generation pipeline
 - Enabled semantic document search and structured knowledge querying
- **MedCo – Healthcare Application** | Django + React
- **Decore – E-commerce Platform**

EDUCATION

Full Stack Development Bootcamp (Backend Focus) – Brototype (2023–2024)
